

Marina Report

August 2015

The activity at the Marina has been up and down this summer. We were able to get the parking area paved by the 4th. they did a great job.

We have been having on going issues with Flick's in supplying us Rec. Fuel. As well as having a problem with our pumping transfer system in the tank. That has now been corrected. I was able to get us set up with Foster Oil from West Branch/Bay City they have been supplying us well and are going to put us in a on land 500 gallon fuel system that will be ours to use as long as we are there customer there's prices are compatible with Fink's and better service.

Another project we completed was a dump station for boaters with Port-a Potties.

I have been trying to control the man hours and the Marina to go along with the weather and sales. I had to take the motor from the barge in to have repaired the estimated cost for that is between \$500.00 and 600.00.

Our open house will be Aug. 15th we plan another great event please come and take part in the days event. Time is from 2pm to 6pm. Lots of Fun and Food Prize's.

I hate to think that just in a short few weeks we will be taking everything back out.

Respectfully,
Frank Homola
