

Marina Report June 2015

We are in full operation at the Marina getting the docks and hoists in early this year to beat the early Memorial weekend.

As one would expect with the cool weather lake use has been down but it is still early.

We had a second Staff/Safety Meeting on Tuesday night with 8 of the 10 Park & Marina employees' there. I have some issues with the Seasonal help status from a couple of the employees but we will get through that.

The pontoon trailer has been working out well so we are recouping some of our investment.

Do to the High winds and High water over the weekend we had several boats being pushed from there hoists. My self and the staff had to cut several locks off in order to get the boats back on and raised higher out of the water. The new Web Site is up and running we have had many nice comments on it. Also mark your calendars' our Customer Appreciation Day is set for Aug. 15th. the time to be determined.

We have been going through the wait list to fill the empty seasonal spots we had open up.

The staff is currently performing general grounds and building maintaince as well as the playground items inspections. I will be getting Bids on the Parking lot improvements that I would like to see done.

Respectfully Submitted,

Frank Homola
