Marina Monthly Report March 2, 2017

As of March 1, only 38 of 137 seasonal slip rental payments have been received. I will be contacting renters who have not yet paid, reminding them of the April 1 deadline to maintain their space for 2017.

- We have made a deal to purchase a stove, refrigerator, and microwave for the kitchen at the marina for \$250.00. We are still looking for a table and chairs for the kitchen. I have spies who are looking out for a suitable set at local resale shops.
- The outboard motor used to install docks and boat hoists needs repairs. I spoke with two marinas and was told that they will not look at outboard motors until April 1. Still working on snowmobile repairs.
- Identified an electrical panel located in the marina office that had wires protruding from the panel, without a cover, and the panel was not grounded properly. Our township electrical inspector recommended a local contractor who checked the wiring, grounded the panel properly, and made a proper cover for the panel.
- The security cameras are now working properly. I met the contractor at the marina who showed me how to reboot the system.
- I will be sending out a request for pricing of new waders for the marina workers.
