Martin (Marty) DeRocco of Milan Supply Company and Milan Engineered Systems was introduced. He gave an extensive description of on-site disposal versus advanced treatment of solid wastes. The advanced treatment accelerates the natural system by increasing the oxygen in the mixture which is especially effective in coarse and dense soils. Considerable discussion followed regarding the advantages and disadvantages of on-site versus off site storage tanks for the solid wastes especially as it applied to Treasure Island. Further investigation of options is needed.

The Board has requested a final copy of the Septic Ordinance for their review.

The Medical Marijuana Ordinance still needs legal review.
